

Discover Fiji® Water

Perfection from the Islands of Fiji

FIJI® Water comes from the pristine Fiji Islands, a virgin ecosystem surrounded by thousands of miles of ocean protected from external elements and pollution. Each bottle of FIJI Water is unique, refreshing and pure, as nature intended.

PURITY, PROTECTED

Unlike spring or purified water, FIJI Water is natural artesian water that originates from an aquifer – an impermeable volcanic chamber deep within the earth. With no access to the earth's surface until it is bottled, its purity is protected.

LUXURY IN A BOTTLE

FIJI Water begins as rainfall that filter over volcanic rock over hundreds of years, imparting abundant amount of vital mineral including silica, which not only helps strengthen hair and nails, but also give FIJI Water its soft taste luxurious feel.

UNTOUCHED BY MAN

Bottled at the source, natural artesian pressure forces water through our sealed delivery system. That water is never exposed to the external environment... until you unscrew the cap.

An Exclusive FIJI® Water Home Delivery Offer

Sign up by December 31, 2007 for Recurring Delivery of FIJI Water and you will receive a complimentary case after 3 months of ongoing delivery.
